Live more than 20 unforgettable experiences in one of the best destinations of nature, history and culture. Travel respecting the integrity, conservation, protection of the environment and our local culture.

To live unforgettable experiences, sensations and emotions in the nature you can come alone, in couple, family or with your group of friends and it will always be a plan to the measure.

Through adventures in interesting places such as the Cueva del Indio, a cultural walk in the Palenque de los Cimarrones or simply enjoying the biogeological evolution of the Valle de Viñales in the Mural de la Prehistoria you can be in direct contact with nature. Walk bold trails in Mil Cumbres or travel to the westernmost part of the archipelago and feel the thrill of being in one of the country's six biosphere reserves, Guanahacabibes. Discover Cuba's most photographed seabed in María la Gorda. Don't leave the province without visiting two dream places: Cayo Levisa and Cayo Jutías, paradises to rest and practice nautical activities.

Join us in this struggle for the Western Pinar del Río.
