In order to make purchases, the first thing to do is register, once only. From now on, the customer selects according to the type of products and putting it on a shopping list (commonly known as a cart). At the end of the purchases, the payment is made where all the selected products are listed and the total amount to be paid. From this action, a sequence of steps continues in which the beneficiary's data is defined, which can be the same as the purchase or another person.

If you have an amount from 20 CUC, you can request transportation service with an additional cost. Finally, the payment order is sent and if you are browsing from the cell phone, you can enable the online payment option by Transfermóvil with the data inserted, or if it is on a PC a QR code appears which is scanned with this application Payments. In both cases the information is completed with the Telebanca PIN and the card to be paid is selected. The payment is executed and in a few seconds the operation is completed receiving the notification.
